Unique Indigenous platform and indigenous health research focused activities views as:

+ Positive

Improving & increasing over time

Strengthening the involvement of Indigenous communities

Indigenous health-focused research to remain at forefront of SCPOR's activities

Opportunities Moving Forward

Greater supports for earlier stages of research projects

Use of PORLET and IRLET to support Patient Partner engagement

Increase engagement of decision makers in research projects

Engagement of representative and diverse Patient Partners

Revisit use of term "Patient Partner"

Continued focus on improving data infrastructure and access

Increase awareness to all stakeholders to ensure sustainability of SCPOR going forward

SCPOR 2.0

SCPOR is equipped with the foundation and tools to move forward with SCPOR 2.0. Embedding POR within the SHA and movement towards an LHS model viewed as crucial to the continued success of POR in Saskatchewan.

SCPOR 2.0 Core Components

- Capacity Development
- Learning Health Systems (LHS)
- Data Services
- Patient Engagement
- Indigenous Research & Engagement
